9-3 2.0T

2003-2006 MY

230HP/350Nm Performance upgrade

2.0T **manual** 270006201

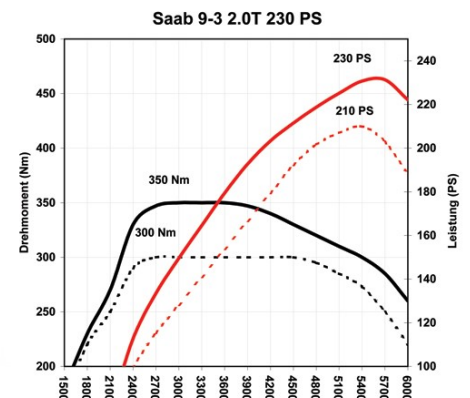

2.0T **automatic** 270006251

The 2.0T engine with its large turbocharger and sporty camshafts provides a good old-fashioned Saab turbo feeling already in the standard configuration.

This software upgrade calibrated for 98 octane fuel adds enough torque and power with a beautiful torque curve to make this lightweight car really enjoyable to drive.

Of course, since the upgrade is from Hirsch Performance, all engine parameters are kept in safe operating regions to ensure that the engine provides unrivalled reliability and durability regardless of the driving style.

The Hirsch Performance software upgrade adds an additional fun factor to the car's overall driving experience, and makes it a true driver's car.
