# 9-3 2.8 V6

2006-2010 MY

275HP/400Nm Performance upgrade

2.8V6 **manual** 270006301

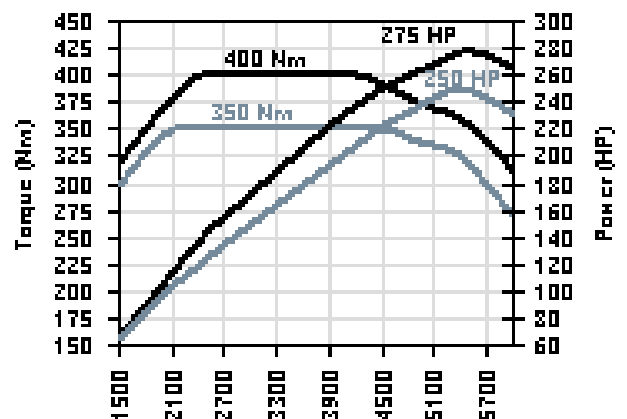

2.8V6 **automatic** 270006351

For the driver who appreciates ample low-range torque and a smooth-running engine, the twin scroll V6 engine is the engine of choice.

No other engine in the Saab range offers such smoothness and such a wide rpm range with full torque.

With the software performance upgrade from Hirsch Performance, the pedal response is improved, and the torque is increased to provide the feeling of a smoothly accelerating aircraft.

In its upgraded form, the engine provides enough effortless power to make any Autobahn excursions at full speed both relaxed and pleasant.
