2011 MY

130HP/320Nm Performance upgrade

1.9Ttid4 8v 270006482

The 170hp performance upgrade generates an immense torque already at very low rpm's for a relaxed driving experience, and the power delivery is exceptionally smooth, completely masking the transition between the two turbochargers.

As a result, the car becomes much more dynamic to drive, while at the same time achieving the best fuel economy ever recorded by Hirsch Performance.

The performance upgrade is Euro 5 – compliant.
